<https://t.me/nattyengeda>

A **Computer Science** graduate focusing on **Website** Design and **Mobile** Application Development. I have been fortunate enough to work on some major projects, including **Fitsum Advert** Website and Digitalized Asset management System for FHC Branch 03, where I gained experience managing large-scale initiatives and collaborating with cross-functional teams.

I'm passionate about staying up-to-date with the latest technology trends and incorporating innovative solutions into my work. I believe this is critical to ensuring that the projects I work on are not only successful but also cutting-edge.

Overall, I'm excited about the opportunity to apply my skills and experience to help any organization to achieve their goal, and make the world a better place.
